

SENIOR SYSTEMS PROGRAMMER – WILLIAMSVILLE, NY

National Fuel is currently seeking a Senior Systems Programmer for an outstanding career opportunity within our corporate Information Services group at our Williamsville, New York location. As part of the National Fuel team, the successful candidate will enjoy a challenging work environment with a strong and growing company.

The successful candidate will be responsible for the installation, maintenance and support of the mainframe operating system and system software as well as independent software vendor products. The successful candidate will monitor mainframe hardware usage and performance, implement corrective actions pertaining to any performance issues, and will be responsible for the resolution of production problems. The Senior Systems Programmer will provide support to other software development professionals in the form of research, evaluation, testing and installation of applications as well as providing technical expertise for Disaster Recovery.

Candidates must possess a minimum of a Bachelor's degree in Computer Information Systems, Management Information Systems, Computer Science or a related field. Five to ten years of experience as a systems programmer in an IBM z/OS environment is required. Candidates must possess excellent interpersonal, communication and problem-solving skills and demonstrate the ability to excel in a cooperative team environment. Strong analytical skills, proficiency in software development, and the ability to coordinate multiple projects are essential to success in this position. Candidates must be available for support calls outside of normal business hours.

National Fuel offers a competitive salary and a comprehensive benefits package. For confidential consideration, please submit your resume, cover letter and college transcripts by May 21, 2010 to:
