

Senior Drilling Engineer – Brookville, PA

Seneca Resources Corporation, the oil & gas exploration and production subsidiary of National Fuel Gas Company (NYSE: NFG), is currently seeking a Senior Drilling Engineer at its East division office in Brookville, PA.

The Sr. Drilling Engineer will serve as an integral member of the team with responsibilities including, but not limited to, the following:

- Develop and design drilling programs including casing, BHA, mud, cement, bit selection and directional components
- Prepare and track cost estimates
- Supervise field personnel on multiple rigs
- Promote exemplary HSE practices
- Ensure accuracy of electronic well file
- Conduct post well analyses and recommended improvements to organizational best practices

This position requires a minimum of a bachelor's degree in petroleum or mechanical engineering along with 5 to 10 years industry experience including at least 3 years in drilling, preferably in horizontal drilling and resource plays. The successful candidate must have knowledge and experience working with MS Office products as well as Wellview or similar electronic well database. The ability to be a team player emphasizing cost and efficiency improvements and solving problems as they arise is required.

Candidates responding to this posting must refer to the job title, Sr. Drilling Engineer, or Requisition ID, #10-19PA, in their correspondence. For confidential consideration, please mail your resume, cover letter and employment references by May 10, 2010 to:
