

SUMMER 2010 ENGINEERING CO-OP – ERIE, PA

National Fuel Gas Company (NYSE: NFG) is a diversified energy company with corporate headquarters in Williamsville (Buffalo), New York. The Company's assets are distributed among four business segments: Exploration and Production, Utility, Pipeline and Storage and Energy Marketing. National Fuel's history dates to the earliest days of the natural gas and oil industry in the United States and the Company has been responsible for many industry firsts.

Based out of our Erie, PA office, the successful candidate will update and create gas flow models for various National Fuel Gas service territory areas. The co-op will also update maximum allowable operating pressure information for the transmission system and analyze and update pipeline integrity data using completion reports. Other projects will be assigned as needed.

A minimum of two years of an Engineering curriculum is required. Concentrations in Mechanical, Civil, Electrical or Chemical are preferred. Strong verbal and written communication skills along with demonstrated interpersonal skills are essential. The successful candidate must be self-motivated and able to work independently as well as in a team environment. Excellent computer software skills, including Microsoft Word, Access, and Excel are needed. Proficiency and or experience with CAD is desirable. Please submit your resume and cover letter by March 19, 2010 to:
