Declaration of Underdelivery Operational Flow Order (OFO)
Pennsylvania Service Territory
January 21, 2011

In accordance with the provisions of our Pennsylvania tariff, NFGDC is declaring an Underdelivery Operational Flow Order for gas scheduled to flow to Monthly-Metered Transportation (MMNGS and SATS) market pools beginning at 10:00 a.m. Eastern Standard time on January 22, 2011. This action is being taken to safeguard the operational integrity of the NFGDC system given the forecasted colder than normal weather.

We anticipate that this OFO will continue in effect for a three day period ending 10:00 a.m. Eastern Standard time on January 25, 2011, and may be extended if necessary. We will provide prior notice if this is to occur.

Deliveries to MMNGS and SATS pools on the NFGDC system must be at least 100% of the aggregated daily delivery quantities (ADDQ's) posted daily on the NFG website. Deliveries less than the above stated percentages will be subject to penalty charges specified in the tariff. Suppliers that wish to deliver in excess of 105% of any Market Pool's ADDQ during this period should request DDQ changes per standard operating procedures.

Service classes not identified in the above OFO shall remain subject to the System Alert that was issued on January 19, 2011. Suppliers for Daily-Metered Transportation Service customers should continue to make every effort to match daily deliveries with daily customer usage.

If you have any questions, please contact David Wolford at (716) 857-7483.
