Dear «Salutation»«OWNER\_LAST\_NAME»:

National Fuel Gas Supply Corporation, a subsidiary of National Fuel Gas Company (National Fuel), plans to file an application with the Federal Energy Regulatory Commission (FERC) for authorization to modernize a segment of its system in northwestern Pennsylvania, impacting Cameron, Clearfield, Elk, McKean and Potter counties (FM100 Modernization Project). Specific components of the FM100 Modernization Project include:

- Installing approximately 28.9-miles of 12 or 16-inch steel high-pressure natural gas pipeline in Sergeant, Norwich, and Liberty Townships in McKean County, and Roulette, Pleasant Valley, Clara, Hebron Townships in Potter County
- Installing a new natural gas compression facility in Sergeant Township in McKean County
- Installing a new metering and regulation facility in Hebron Township in Potter County
- Installing approximately 1.2 miles of 24-inch steel high-pressure natural gas pipeline in Allegany Township in Potter County
- Inserting approximately 12.5-miles of 6-inch FlexSteel high-pressure natural gas pipeline into National Fuel's existing 12-inch steel natural gas pipeline (Line FM120) in Sergeant Township in McKean County, Jones Township and the City of St. Mary's in Elk County, and Shippen Township in Cameron County
- Removing from service approximately 12-miles of 12-inch steel high-pressure natural gas pipeline (Line FM120) in Shippen Township in Cameron County, and Benezette Township in Elk County
- Removing from service approximately 44.9-miles of 12-inch steel high-pressure natural gas pipeline (Line FM100) in Huston and Lawrence Townships in Clearfield County, Benezette Township in Elk County, the Borough of Driftwood, and Gibson and Lumber Townships in Cameron County, and Wharton and Portage Townships in Potter County
- Decommissioning a natural gas compression facility (Costello Compression Station) in Portage Township in Potter County

Additional information can be accessed by visiting <https://www.natfuel.com/supply/FM100/default.aspx>.

The FM100 Modernization Project is currently participating in the FERC National Environmental Policy Act (NEPA) pre-filing review process at Docket No. PF17-10-000. National Fuel plans to submit a formal application to the FERC in April 2018, with a target in-service date of spring 2020.

National Fuel invites you to attend an open house meeting to learn more about the FM100 Modernization Project. At the meeting, National Fuel representatives will provide attendees with a project overview and will be available to answer questions about the FM100 Modernization Project.

**Monday, November 13, 2017**  
Port Allegany Veterans Memorial Inc.  
4743 PA 155  
Port Allegany, Pennsylvania 16743  
Meeting to begin at 6:00 P.M.

A representative from FERC will also be present at this meeting to explain FERC's role as lead agency and provide information about the environmental review process. Information about your rights and ways to become involved in this process can be found on FERC's website (<http://www.ferc.gov/for-citizens/get-involved.asp>). This information from the FERC will also be available at the meeting. **To RSVP for the November 13, 2017 meeting, please contact me at 1-800-458-0413, Ext. 4199 or [maninoc@natfuel.com](mailto:maninoc@natfuel.com).**

National Fuel Gas Company, incorporated in 1902, is a diversified energy company with a strong presence in Pennsylvania. Our Pipeline and Storage segment has a long history of building and maintaining safe and reliable transmission pipelines and owns and operates more than 2,500 miles of interstate natural gas pipelines. We look forward to working with you on this project.

Sincerely,

Carly Manino  
Assistant Director  
Corporate Communications
